The Team Engagements are built around real patient stories upon which targeted questions engage teams to understand the most common clinical challenges, address team specific communication issues, and determine how to collectively work with daily system gaps through structured facilitated discussions. The 30 Minute Weekly Team Engagements are easy to implement cases that are freely available to every healthcare team around the world and can be a foundational element to minimize preventable errors and significantly reduce patient harm.</p> <ul style="list-style-type: none"> <li>• Sepsis</li> <li>• Medication errors</li> <li>• Healthcare Associated Infections (HAI)</li> <li>• Care teams</li> </ul>
